## Great Empires, A Fight to the Finish... and Pasta?

Get ready to brush up on world history with these handsome and hysterical personifications of the Axis Powers as they meet, become friends and form one of the most powerful alliances the world has ever seen! It all begins when tough soldier Germany stumbles upon Italy, who, despite being the descendant of the greatest empire in history, is found hiding in a tomato box. In another twist of fate around a rather lovely kotatsu, Japan hops on board and the Axis Powers are forged. What trials and tribulations will this mighty trio face?

# Meeting of the World

All right  
guys, time to  
start the world  
meeting!

Let's join hands  
and solve all the  
world's problems,  
one by one!

Don't be  
afraid to voice  
your honest  
opinion!

We've learned  
a lot over the years,  
so if we all work  
together, there's  
nothing we can't  
overcome!

I agree with  
America-san.

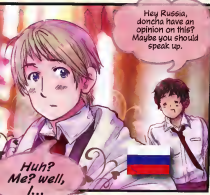

Not again,  
Japan! Do you  
ever have an  
opinion of  
your own?!

Let's start by tackling  
the issue of global warming.  
I know that's a hot topic  
right now, but I think we can  
keep it in check if we create  
a giant hero to protect  
the planet.

By the way, nobody  
is allowed to disagree  
with me.

Waaaa!  
Nobody  
wants my  
snacks-aru!

Shut your  
mouth, or I'll  
subjugate you  
for another  
100 years!

Please calm  
down...

Hahaha! Nice  
fight, you two!  
Now does anyone  
have any hamburgers?  
I'm starving!

Oh no you  
don't, Yankee!  
Big Brother's  
going to teach  
you a lesson!

You don't  
want another *Der  
Kongress tanzt* do  
you? Can't we sit  
down and talk like  
respectable human  
beings?!

Germany...

**EVERYONE  
SHUT UP!**

This meeting  
was to solve  
problems, not  
create new ones!

Der Kongress tanzt ("Congress Dances") After the death of Napoleon, the European leaders meet at Vienna to determine the future of their war-torn nations. However, the meeting was made fun of because the members ended up dancing as much as talking.

All right,  
everyone back  
to your seats.  
I'll be running this  
meeting from  
now on.

Y-you're right.  
Forgive me, I  
lost myself in the  
excitement.

Hmph. Well, as  
long as you understand.  
And no more 100-year  
subjugations.

*Those who wish to speak must support their opinions with valid research and data!*

*Each speaker will be given eight minutes and not a second longer! And absolutely, NO CHATTING!*

Germany, you look like you're ready to murder someone.

That settles it. Whenever you're prepared to speak, raise your hand.

Even though you're not compromising at all...

I think that's a wonderful compromise, Germany.

Hmph. Very well. I give you permission to speak, Italy.

OH, ME ME! LET ME GO!

This is the tale of all the countries in this wide world.

# Prologue

Long, long ago  
there was said to be a  
man who conquered  
the Mediterranean and  
gained all of the  
world's wealth.

His name was  
"The Roman Empire."

But despite his  
wealth, his fame,  
his many servants...

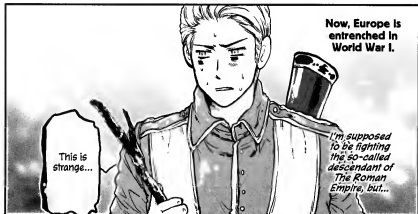

...and his vast  
tracts of land...

...simply  
disappeared.

...one day, this  
man who had  
the world in  
the palm of  
his hand...

[Worst?] German sausage. Stuffed into animal casings. It is said to have been created by nomadic tribes from Northwestern China and passed down to Europe.

Please don't shoot! I'll do anything! Anything! Forgive meeee!

Waaaah!  
I'm sorry!  
I'm soooooorry!  
I'm not really a tomato fairy at all!

There's no way the descendant of The Roman Empire could be so pathetic!

Is this really the guy I'm supposed to be at war with?

I'm just an ordinary Italian! I have relatives in Bayern!

You wouldn't want to kill an innocent virgin, would you?

Answer me one thing.

A-are you really my enemy? A descendant of the great Rome?

Don't I get a last meal?! Can't I eat pasta before I dieeee?!

Yeah, there's no way...but then again, what the hell is this?

He's probably just an ordinary citizen, like he said.

This can't be right. There must be some sort of mix-up.

["I have relatives in..."] This was a line frequently used by Italians to try to avoid getting killed. (Example: To an American soldier, one would say, "I have a relative in Brooklyn.") So what?

*This useless  
little twerp  
is really Italy?*

I thought  
you were  
pretty scary  
at first, but  
if you know  
Grandpa, you  
can't be  
that bad!

I'm Italy...  
Rome's  
grandson. I'm  
a delightful  
scamp who  
loves pizza  
and pasta!

Huh...?  
You know  
Grandpa  
Rome?

I just wanna  
be frie--  
yahhhhhhh!

**YOU  
CAN'T  
TRICK  
ME, YOU  
PASTA-  
LOVING  
DUMM-  
KOPF!**

He's putting  
up an innocent  
front to catch  
me off guard!  
That little  
bastard!

Not this  
is obviously  
a trap!

At the time,  
Germany had no idea  
this encounter would  
change his very destiny.

...  
Might?

## North Italy

[Official Name] Repubblica Italiana  
 [Capital] Rome  
 [Official Language] Italian  
 [Birthday]  
 March 17th, 1861 (Italy unified)  
 [National Flower]  
 Palsy

The descendant of the powerful Roman Empire, he somehow fails to follow in the footsteps of his grandfather. His full name is Italy Veneziano.

Frequently spacing out, excessively expressive and prone to fits of whining and crying, he can often be found flailing his arms and legs needlessly. He also has a tendency to hum, sing, speak irresponsibly and touch people a little too much. Despite these numerous vices, the other countries in the world are strangely tolerant of him.

His hobbies include art, design, cooking and taking siestas. He is known to love pasta, pizza and cheese.

[Official Name] Repubblica Italiana  
 [Capital] Rome  
 [Official Language] Italian  
 [Birthday]  
 March 17th, 1861 (Italy unified)  
 [National Flower]  
 Palsy

Another descendant of the powerful Roman Empire, he also fails to follow in the footsteps of his grandfather. His full name is Italy Romano.

Even after unification, he is not on good terms with his brother, perhaps due to the fact that they were separated for many years.

Although he is cheery and kind towards women, he tends to be less tolerant of men (excluding himself, of course). In particular, he is openly rude to Germany and France. Generally clumsy and incompetent, he is surprisingly good at pickpocketing. His culture, sense of taste and even personality have been passed down from Spain. He loves pasta and tomatoes. His hobbies include flirting, farming, cooking and taking siestas.

*"Eat lead, you potato-sucking bastard!"*

## Germany

[Official Name] Bundesrepublik Deutschland  
[Capital] Berlin  
[Official Language] German  
[Birthday] Unknown  
[National Flower] Blue Cornflower

*"Not you again!!"*

While the rest of Europe was flourishing, Germany was impoverished by constant war. Surrounded by the self-absorbed Austria and the sexually-aggressive France, he is forced into a turbulent lifestyle. To make matters worse, he is frequently harassed by both his tyrannical boss\* and Italy.

Germany is excessively serious, always following rules and regulations to the letter. However, after a few beers, he begins to let loose, allowing his pent-up frustrations to explode. He is judicious at everything he does, but technologically illiterate. For example, every time he uses a GPS, he is struck with a sudden urge to use the bathroom. His hobbies include saving money, cleaning, baking and walking his dog.

Although he would never admit it, he loves to tour around Italy.

\*Boss: Meaning, the Führer.

# 50 Reasons Why We Love Germany

[Russia in WWI]

Apparently the Russian soldiers were frequently short on weapons, clothes and food. When they were released from German prisons, they were said to be terribly depressed.

Boss: Meaning the head home in their country.

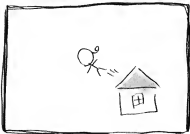

(Hyperinflation)

After the war, Germany printed massive amounts of marks to make payments to France as quickly as possible. Obviously, this caused the value of their money to tumble. The cost of living increased 300 times in one month, and sometimes the cost of a drink would change by the time you finished it.

["France pulled a fast one"]

Barring with resentment, France declared that Germany (and its allies) were responsible for WWI. Not only that, they demanded 132 billion marks in reparations. If payments were ever late, Big Brother France, who loves to swoop in at opportune moments, would take over the Ruhr region.

# Germany Obtained A Shield Of Destruction

# Something More Important Than Tanks

[Niccolo Machiavelli]

Wrote the famous treatise "Il Principe" in response to Italy's dismal political state in 1513. Sadly, when his political theories were put to the test, it turned out to be another "Itaru" (Japanese for "useless"). Military theorist Carl von Clausewitz (light havel) said, "Well, he's not wrong per se. Not wrong, but..."

Germany and Italy  
were captured by  
the English military.

All right,  
spill it!  
What  
are you  
plotting?

Don't point  
a gun at me!  
I'm sorry!  
I'll tell you  
everything!

Yes!!!  
Noooo!

Torture me  
all you like, but  
I won't say a  
word! You're  
wasting your  
time!

Watch out, this guy is a  
total sadist! He has a big  
collection of these creepy  
sex DVDs and stuff. One of  
them even had a dog! I think  
tying people up gets him off!  
I hear his government even  
encourages that kinda stuff!

Do you have  
any idea what  
I have to go through  
on a daily basis?  
Your torture would  
be like a mosquito  
bite to me!

I hate  
you!

I suppose  
so, but try to  
keep it clean.  
Be careful with  
the flour  
and oil...

Germany!  
Germany!  
I wanna cook  
a special  
dinner just for  
you! I can use  
your kitchen,  
right?

Oh, don't  
mind  
me.

(Unless Modern German Military Fanatics)  
At one point 80% of the German troops were overweight.  
Sexual intercourse between troops was officially approved  
with mutual consent, of course.

# 60 Years Ago, I Was a Shut-in

(Tripartite Pact)  
In September of 1940, Japan, Germany and Italy signed the Tripartite Pact in order to solidify their military alliances. The pact specified that if one party were attacked, the other countries would respond with military support. However, instead of deterring an American military response, it instead led to war being declared against all three countries. The pact was signed in Berlin, so obviously it didn't actually happen at a heated katana table.

# Western Front

(Western Modesty)  
Italy, Germany and much of the European countries' sense of propriety regarding nudity is lax. In fact, there is so much nudity (male and female) on Italian television that it has become a problem. In America, it is common to see men and women in various states of undress basking on the lawn.

(Escargot)

A variety of (and small) snails found in vineyards. In France (particularly Burgundy), they are used for food. They are very soft. Their Japanese name is ringomalewa. (See!) Out!!

Italy has been cute lately!  
Don't you think it's adorable how Italy has been tagging along  
with Germany these days?

On the land of the Pythagoras!

There was once a famous unit of General known as the Pythagoras, impressed by their valor Italy donated a column from Pompeii to decorate their local resting place. In addition Germany donated a stone monument that read, "Dedicated to the Spirit of Pythagoras." Although the engraving was removed by American soldiers after the war, the monument itself (as well as the column) can still be found in Alize of Padova Prefecture.

# The Freeloader Takes Control

[Screen]  
Turkey's only island in the Black Sea and the world's largest producer of hazelnuts. The highest grade hazelnuts are generally said to be "Vizian quality." Incidentally, it is sister cities with Sapporo, Japan, which is famous for its cherries.

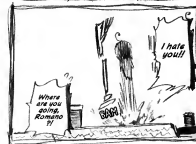

[Franz Joseph]  
The last Emperor of Austria. A total cheapskate. Even though he was emperor, he would patch up his clothing again and again until he looked like a homeless person. I guess even royalty has it tough sometimes.

Like potato!  
What kaka!  
A common  
Italian phrase  
used to express  
irritation.

[Unwanted House Guests]  
An estimated 10,000,000 Germans come to visit Italy every year. When the Italian Prime Minister made a statement about German tourists being annoying, it caused quite an uproar. They seem to be on better terms now.

[England's Spy Organization]

Although England's government has adamantly denied the existence of their spy organization, it is so well known to the public that if you ask a taxi driver to take you to "M16," they'll know exactly where to go. Perhaps they've changed their policy of secrecy lately, since the organization has started to post employment ads publicly.

## The World's Number One Pervert: Part One

Back One

[Going to be Greece]

According to a survey that was conducted by an English random company, the country that has the most sex is Greece. As an added note, Japan was dead last.

# HETALIA AND HIS MERRY FRIENDS

## Japan

[Official Name] Nihon-koku  
[Capital] Tokyo  
[Official Language] Japanese  
[Birthday] February 11  
[National Flower] Cherry Blossoms, Chrysanthemum

Despite its small size and isolation throughout nearly half of world history, Japan has become a global powerhouse in only a few decades. Living alone in the middle of the ocean, his culture and customs are unique from the rest of the world. Although he is considered mysterious by many, he views himself as exceptionally normal.

Although Japan is serious and hard-working, he is also a bit naïve and tends to be a pushover. Skilled with his hands and appreciative of fine aesthetics, he enjoys watching flowers, the moon and the change of seasons.

## America

[Official Name]

United States of America

[Capital] Washington D.C.

[Official Language] English

[Birthday] July 4, 1776

[National Flower] Rose

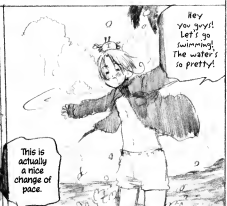

America is a quick-thinker with a positive attitude and a pioneering spirit. Youthful and energetic, he always wants to be number one. He absolutely loves heroes, justice, freedom and hamburgers. Unfortunately, due to his egotistical personality, England and Japan are his only friends.

As America's sense of taste was passed down from England, he isn't the least bit afraid of eating anything (even if it's green or slimy). His hobbies include sports, playing games and making movies. If a UFO crash-landed in his back yard, it is likely that his boss is friends with the alien inside.

[American ice cream]

In America, there are ice cream trucks patrolling neighborhoods all the time. Even without going to the store, consumers can score a variety of flavors in bright red, blue, and beyond. As if that's not enough, the calorie-starved consumer can even buy massive buckets of ice cream. These legendary super-sized portions are NOT urban legends.

*In the end, everyone got hungry, and the meeting was adjourned without reaching any conclusions.*

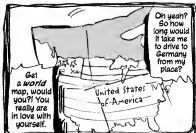

So, what were we talking about again? Spielberg, was it?

Huh? I think we were talking about Germany...

I always end up fighting with those blokes. It's such a pain...

OF COURSE! YOU'RE MY SPECIAL PAL!

Oh, it's you! You didn't come all the way here just for me, did you?

[England's Magic]

During WWII, England's intelligence division hired the famous occultist Aleister Crowley to cast a curse upon Germany. I suppose that's to be expected from a country that grants citizenship to ghosts.

Favored by Busby, a famous warder from the 1790s. During his life, he sat upon this chair as if haunted by it. After his death, it was rumored that anyone who dared sit in his favorite chair will die shortly after. Currently the chair is hung upside down to prevent people from trying. Of course, England still uses it in emergencies from time to time.

## Good Luck Beating that Curse

### [Russia's Curse]

The entire Russian Orthodox Church continuously cursed Japan during the Russo-Japanese War. Regardless, Russia still lost. However, 18 years later, Japan was hit by the Great Kanto Earthquake of 1923. Although his curses seem to hit the mark eventually, it is said that Russia's god is located 18 light years away. As an added note, Russian newspapers still print advertisements for curse relocation services, where you can pass your curse onto someone else.

## HETALIA AND HIS MERRY FRIENDS

### England

[Official Name]

The United Kingdom of Great Britain and Northern Ireland

[Capital] London

[Official Language] English

[Birthday] Unknown

[National Flower] Rose

A rascally empire that turned in its pirate flag to live the life of a gentleman (?). Although he was formerly a minion of France, their positions were reversed when England claimed half of his land. As a result, the two have a long-standing feud with one another. Known as the bad-boy of Europe, he uses his skills as a former pirate to pester Spain and colonize other nations.

Despite his cold demeanor and sarcastic personality, England is extremely loyal to his friends. Famously cynical and aggressively competitive, he comes across as more villainous than he actually is. An avid fan of ghosts, fairies, magic and legends, England provides ghost tours and even allows ghosts to register as residents of his nation. In addition to rampant superstition, his country is also plagued with a sea of erotic and idiotic news stories.

## France

[Official Name] République française  
[Capital] Paris  
[Official Language] French  
[Birthday] July 14  
[National Flower] Iris

Once a European powerhouse, France turned in his sword to live the life of a farmer after the death of Napoleon. Now France enjoys showing tourists around his beautiful vineyards with a glass of wine in hand.

France is arrogant to an extreme, priding himself on his taste in language and art. Although his pride has put him on bad terms with England, he has a certain respect for England's strength. A lover of anything beautiful, he does not discriminate between men and women in his romantic endeavors.

I came here because I heard this old castle would be affordable, but...

# GHOST HOTEL

[Japanese horror]  
Famous Japanese horror films include Ringo and Juon. Video games such as Siren and Fatal Frame also adopt a similar style. Using silence as a tool for suspense, the source of horror often lies just beyond view. Thanks to its unique sense of tension, Japanese horror has become popular around the world. Perhaps it is due to Japan's national character, but the lesson in the end is often: the living are more frightening than the dead.

#### [American horror movies]

Up until recently, the template for American horror movies was: A monster appears—a town is enveloped in chaos—the main characters die one after another—the monster is defeated with willpower—peace is restored—End... or so it seems until you realize one of the monsters is still alive. Recently, more variations have been added, however, anyone having sex on screen still usually ends up dead. Despite their predictable nature, American horror movies always deliver lots of screams, action scenes and monsters.

#### [English horror]

A large number of the tourist attractions and hotels in England are said to be haunted. Their horror movies often have a gothic feel. Although they are less popular now, there was a huge English horror movie boom in the '60s. Recently, English and American filmmakers collaborated to make a zombie film called *28 Days Later*, where everyone in England is infected by a virus that causes rage. As an added note, German horror movies are usually just full of gore.

"Germany, Germany!  
I'm in North Africa right  
now, and I can't tie  
my shoes! Oh, and uh...  
England is here, too."

I'm the only one who knows what to keep and what to toss.

Nope, it's all right. I'm actually just clearing out my closet so please continue your daily duties.

America-san, if you're cleaning, I don't mind helping out.

## AMERICA CLEANS OUT HIS STORAGE ROOM

It's time to put this to rest!

I haven't touched this stuff in over 100 years.

Here we go...

All right then, how about I make some coffee?

Sounds great.

This is for me? Really?!

No matter how many times I try to do this, the memories are always too much for me to bear.

Easier said than done, I guess.

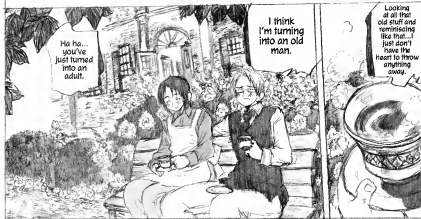

# A Touching Conversation Ruined

[Panjantrum]

The Panjantrum was a rocket-propelled cart designed to penetrate Germany's massive defense fortresses during the Normandy Invasion. Ideally, the weapon would speed ahead at about 60 miles per hour, making any German counterattacks nearly impossible. Unfortunately, the sand-covered contraption was unable to move straight, and in the end, the only thing revolutionary about it was its complete uselessness.

And you are shopping for groceries.

You are a German.

...but the check-out line is unusually long.

You were lucky enough to catch a great deal on bratwurst...

In Spain, such carefree cashiers are an everyday experience.

This is because the cashier is from Spain, where relaxed personalities are common.

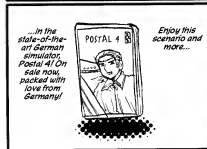

This is a common scene in Greece.

To top things off, a Greek, who is also laid-back, sets his items down as slowly as possible.

## Russia

[Official Name] Rossiyskaya Federatsiya  
 [Capital] Moscow  
 [Official Language] Russian  
 [Birthday] December 30  
 [National Flower] Sunflower

A massive northern nation who was once a terrible bully. In Russia, you can't do anything without vodka. For Russians, vodka is fuel. Every time Russia tries to invade southern territories, England stops him. As a result, Russia feels compelled to punch England at every encounter.

Thanks to annual visits from General Winter, Russia has grown to hate snow. Regardless, General Winter always seems to emerge as a powerful ally when it's time to go to war.

Although Russia may appear big-hearted with rural innocents, he is also childishly cruel. This is probably due to the fact that his history is bathed in bloodshed and tragedy.

\*Although his official name was the Soviet Republic back in the day, this story will address him as Russia. So be careful to note this any time you're taking a test, please.

## Poland

[Official Name] Rzeczpospolita Polska  
 [Capital] Warsaw  
 [Official Language] Polish  
 [Birthday] July 22  
 [National Flower] Pansy

Poland was once a superpower who ruled Middle and Eastern Europe with his partner Lithuania. Unfortunately, with the demise of his nobility, his power faded. Although his land has been divided up by other nations countless times, he always amazingly manages to rise up and survive like the phoenix. He also has an infamously awesome national anthem.

Despite his tough exterior, Poland is actually quite shy and slow to trust others. This may be for the best, since he can be quite troublesome once he gets to know you. Poland's impulsive nature constantly causes numerous countries to take advantage of him. However, he tends to get along exceptionally well with Lithuania and when crossing each other's borders, there is very little enmity.

His Valley girl accent from Nagoya is a product of the manga artist's strange tastes.

## Lithuania

[Official Name]

Lietuvos Respublika

[Capital] Vilnius

[Official Language] Lithuanian

[National Foundation Day] February 16

[National Flower]

Common Rue

Lithuania is the eldest of the Three Baltic State Brothers. He was originally a member of the Teutonic Knights but later revolted against the Christian church and became Grand Duchy of Lithuania. Although he was constantly pursued by German knights advocating the spread of Christianity, he did not accept the religion himself until forming the Polish-Lithuanian Commonwealth. Even so, his peace was short-lived, as he was eventually forced to succumb to Russia.

Like the other Baltic brothers, Lithuania can be a bit of an introvert. However, he is especially good-natured and likes to take care of his friends. Tragically, his considerate personality might have helped earn him the title, "country with the highest suicide rate." He loves literature and martial arts. He always buys his cars used. Lithuania is also known to be quite picky with spices and condiments, rotating various flavors of ketchup and mayonnaise on a daily basis.

The wisest of the Baltic brothers and the most lucky as well. The beautiful cities of Estonia have remained untouched by war and attract many tourists from all around the world.

Mild-mannered, smart, poised and financially secure, Estonia is on friendly terms with most other nations. However, despite his excellent standing, his self-centered way of doing things prevents him from gaining much recognition.

The youngest of the Three Baltic States, Latvia has lived a troubled life. Taken over by German knights when he was still young, he later banded together with Poland and Lithuania only to be split in half and conquered by Russia.

Latvia is big-hearted, but shy and withdrawn. He loves poetry and romance novels. Unfortunately, he tends to be unintentionally blunt, often drawing Russia's ire.

[Anglo-Franco Alliance]

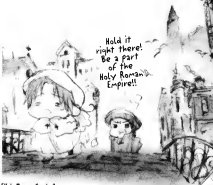

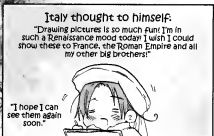

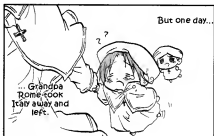

In 1956, with tensions mounting from the Suez Canal Crisis, the Prime Minister of France, Guy Mollet, suggested an Anglo-Franco Alliance, stating that he wouldn't mind "Queen Elizabeth becoming co-minister." Even after England rejected the idea, France still insisted they wanted to join the English commonwealth. No matter how you look at it, that's just impossible.

## CHIBITALIA

[Holy Roman Empire]

Clearly enamored with their ancient counterpart, the "new" Roman Empire felt the need to add "Holy" to the beginning of their name. Despite their name and lofty aspirations, they failed to include Rome itself in their acquisitions. Frequently urging Italy to join them by force (laughs), the Holy Roman Empire's dream was to combine Italy and the Germanic tribes to form a Holy Roman United Kingdom.

[How Italy Became the Target of Bullying]

After Rome dissolved, Italy became a collection of tiny countries.

At that time, Italy had everything... fertile lands, a warm and habitable climate, rich culture, history, arts and religion. It was a very attractive country.

Unfortunately, it was also **extremely weak**.

From the outside, Italy was both desirable and easy prey. When France initiated an invasion, other strong nations couldn't resist pouring in from land and sea alike.

I understand completely.

Big Brother Spain looks so sad!

And so, I, Austria, am your new owner.

Oh... it's you, Ita-chan. Lemme tell you something...

In addition, I will take control of your land, industry and politics.

Huh? Why? What do you mean?

Not a chance.

[Austria-san]  
In addition to taking control of Italy, Austria began to conquer the weakening Italy Roman Empire as well.  
An avid fan of naps, he is a proppy intellectual who built an empire where the sun never set.

[Italian Wars]  
The Italian Wars were the bloodiest conflicts the region had ever seen. After their conclusion, the battered Italy was picked apart and divided among more powerful nations. This marked the end of Italy's pampered life.

JACKET: Rane Halsberg

(The Renaissance and Italy)

As obeying the other nations became Italy's primary concern, their artistic innovations during the glittering Renaissance era became a thing of the past. Thus, Italy would no longer take center stage in world history for many years. As an added effect of their obedient lifestyle, both their territory and military strength shriveled like an earthworm in the summer sun.

["Unsettling mood"]  
Although the Holy Roman Empire claimed to be a nation, its actual territories were controlled separately. Since all of its different states were essentially split, surrounding nations began to butt in on their business in the name of religion.

["I have been abandoned"]

The Holy Roman Empire continued to have religious conflicts even after the Peace of Augsburg. The final blow occurred in 1618 when a Bohemian revolt against the emperor began a series of battles known as the Thirty Years' War (1618-1648). Devastated by the battles, the Empire fell apart while surrounding nations picked up the pieces.

(Dancing disease)

A "disease" prevalent in Napoli after Italy was taken over by Spain. Although the actual cause was unknown, it was thought to be the result of stress caused by the Spanish invasion. The treatment was a high-tempo dance tune known as the Tarantella.

Therefore (according to Sealand), if Sealand is not a part of English territory, it must mean he is recognized as an independent sovereignty!

Not my territory!

Not English Territory

SEALAND'S TERRITORY!!

Long ago, when a soap splot involving Sealand residents occurred, England stated the area was not a part of English territory and ignored the problem.

Sealand's Battle for Independence ◆

## Go Sealand!

[Will Sealand ever be acknowledged as a nation?]

According to the United Nations, the foundation of a country must consist of "natural-forming land and space." As such, the man-made Sealand doesn't quite fit the bill. Even so, Sealand is able to tout its own sovereignty on technicalities within international Regulations. For example, Sealand was able to declare its independence because it is located three nautical miles outside of British waters.

In addition, "Prince" Roy Bates was attacked through a German-invested coup d'état, and about 20 people tried to do a forceful takeover. Upon the criminal trial of this incident, England refused to get involved with the trial, and when German ambassadors were hired, Sealand retorted that the "German Government has acknowledged Sealand as a nation," using the unlucky situation to its advantage. As an added note, these "revolutionaries" declared that they were the righteous monarch because they had established a new sovereign.

## Austria

Born under the proud house of Habsburg, Austria is an intelligent and well-spoken former powerhouse. Austria is on bad terms with France but can easily ignore him when provoked.

Although he is more optimistic and calm than Germany, he is sometimes left behind the times, thanks to his self-centered attitude. Austria loves art, music and national cuisine, often putting his hobbies before work.

Although they speak the same language, Austria's manner of speech is more eloquent and refined than Germany's.

 [National Flower] Pelargonium, Tulip

Hungary was originally formed by a group of nomads, riding through the fields on horseback. Unfortunately, as soon as its citizens settled down, they were invaded by other nations. Because Hungary was never shown any kindness, she has a fondness for Austria, who gives her at least the tiniest bit of respect. When her nation was split in two and engulfed in civil war, he was the only person she had to turn to. Despite the circumstances, she is proud to say that she once had two separate empires.

Hungary is a bit introverted but a hard worker behind the scenes. Although she appears well-mannered, she can sometimes be foul-mouthed, thanks to her history as a wild nomad. She hates Romania so much that she names all of her dogs after famous Romanians.

# Chaos at Daybreak

War of the Austrian Succession

Hello there.

Hey, what's up? I'm Prussia, and I've been working out a lot lately. You wouldn't believe how ripped I am. Now I'm so much stronger than you!

That being said, congrats on becoming empress, but I don't approve. If you want to be acknowledged, then give us part of Silesia. If that doesn't sit well with you, you're gonna be invaded.

From Prussia, with love.

[First Silesian War]

In 1740, Maria Theresa was coronated as the sovereign of Austria and Hungary. Prussia, along with other nations within the Holy Roman Empire, disapproved of a woman rising to power. Although the Holy Roman Empire was quite large as a whole, in actuality it consisted of many smaller nations. Austria initially worked as a unifier between these nations, but as their power slipped, Prussia invaded. As an added note, Italy was still under the rule of the Austro-Hungarian Empire at the time and would not see its territories unified until more than 100 years later.

Chaos at Daybreak  
They Have Managed to Go to Battle

[To summarize it!]

During these times, Europe was completely chaotic. France and Prussia joined forces and dragged along Spain and Holy Rome's Sachsen and Bayern. This "Austria Obliterating Taskforce" became quite a threat. Even so, England was the one nation who supported Austria. Having France as your enemy automatically meant having England as your ally.

# Chaos at Daybreak We Lost Our First Battle So Easily

[Useless England]  
When the war situation became disadvantageous, England, who was Austria's final lifeline, immediately took the neutral position.

# Chaos at Daybreak

## The Final Savior/For Austria Use Only

[Austrian-Bavarian War]  
 Maria Theresa actually went to Hungary in person, and with her son in her arms, pleaded to the nobility for help, crying, "Please save Austria! It is up to you!" It was said that she continued to do this every day until reinforcements were sent. Never underestimate a determined mom!

Chaos at Daybreak  
Italy Did Not Let Us Down

\*Friends: Bad company. He is referring to France.

[Swedish Austrian War]  
While Austria was struggling with France and Prussia, Spain swooped in from the south to take over Italy (Milano) in 1744.

Chaos at Daybreak  
Don Spain's Ambition

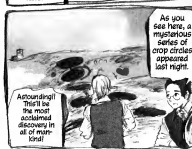

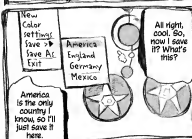

[Spain's Light and Part 1]  
Although Spain was able to take over Milan, Italy (Sardinia) was taken by Austria.  
As a result, Spain was unable to invade Northern Italy. Spain still owes lots of  
money! Good luck with that!

Oselbo: Seasonal gift given during winter.

Thank you for reading this book! I, Hidekaz Himaruya, wrote this while I was studying in New York.

New York is an exciting place full of many different races and ethnicities. One of my original ideas for this manga was to create a story about really useless (hetare), uncool heroes with New York as the setting. While I was researching different personalities for the countries, I found a website with a bunch of ethnic jokes.

Throughout my research, I kept seeing jokes about Italy's military like: "Do we have enough white flags!" or "While everyone else was fighting, Italy was busy retreating." Seeing silly little tidbits like this got me interested in the Italian military and ended up forming the foundation of the manga. Initially, *Hetalia*'s Axis Powers was intended to be a one-shot story, but somehow it ended up being an entire series. God must've been on vacation in New York. To those of you that picked up this book, I can't thank you enough.

## Translation Notes:

♣ Honorifics in Hetalia

TOKYOPOP has chosen to include honorifics to maintain the original feel of the story as much as possible. Here are some examples:

Page 99

-chan

A term of endearment usually given to younger children by their elders. In Chibitalia, Hungary and Spain affectionately call Italy, "Ita-chan." It pretty much means "Little Italy."

Page 117

Page 60

-san

Used when addressing one's superiors age and/or rank. The Baltic States refer to Russia as "Russia-san" because they are ever so fearful of him. In Chibitalia, Italy must address his master with respect and therefore calls him "Austria-san." Italy addresses Hungary as "Hungary-san" because she is older.

Page 99

Page 95

Page 107

Page 106

Page 33

-kun

Typically used when addressing a young boy, hence it makes sense that Sealand refers to himself as "Sea-kun." It shows his stature as a youthful child making it difficult for anyone else to take him seriously. Also, when Japan meets Germany and Italy, he refers to them as "Germany-san and Italy-kun" showing he acknowledges Germany on the same level but considers Italy as younger (or perhaps more inferior).

### 2-D Relationships

In Japan, there is a growing subculture of men and women who delve into real, emotional and sometimes sexual relationships with inanimate objects or characters from anime, video games or manga. A person involved in this type of two-dimensional relationship has typically given up living in the real three-dimensional world and finds it difficult or impossible to relate to a real person. They are much more comfortable hugging a body pillow with a popular anime character printed on the front than having a relationship with another fellow human being.

### Oseibo:

Gift giving is a common practice in Japan. Oseibo is a gift of gratitude (or sometimes obligation) given to colleagues, clients, friends and relatives during the winter season. Ochogen is another seasonal gift given during the summer. During oseibo/bchugen season, Japanese department stores are filled with pre-wrapped gifts including food, alcohol, tea, household goods and so on.

### Kotatsu

A Kotatsu table is a very common fixture in Japanese households. Simply put, it is made up of a frame that is covered with a futon (blanket), and the table top is placed over it. Underneath the kotatsu is a heat source (usually electric). Many Japanese households do not have centralized heating systems and use a kotatsu table to keep warm in the winter. The story are in which the Axis Powers lie asleep with half their body under the kotatsu is a comfortable, familiar scene that all Japanese people can relate to.

Page 91

## China's sentences often end in "aru." Why is that? Is "aru" a Chinese word?

"Aru" is not a real Chinese word—it is a grammatical error or tic often used as shorthand to express that someone is speaking with a Chinese accent (mostly in manga or anime). Where this perception came from is fuzzy and full of contradiction, but the most popular and accepted understanding is that "aru" is from the Japanese phrase "de aru" (an equivalent of "desu") meaning "it is." In Japanese, you can say, "Korewa hon de aru," which translates to "This is a book." To express that a character is unfamiliar with the Japanese language, the "de" in "de aru" gets left out and simply misused as "aru." Thus in Hetalia, China often ends his speech in "aru." Chinese people speaking Japanese do not actually use "aru" at the end of their sentences.

Page 52

## Chibitalia:

A combination of the words chibi, meaning "small" and talia, taken from the word "Hetalia." Chibi can be used as a term of endearment. For example, chibi-kyara means small character, but it is also saying that the character is a miniature (in other words, cute). Chibi can be used as an insult as well. Don't call a growing boy "chibi" as it pretty much means "puny" or "shrimp."

Page 122

## Great Kanto Earthquake of 1923

A tragic earthquake that struck the main island of Honshu in 1923. Areas affected (or more like completely destroyed) include Yokohama, Tokyo, Chiba, Kanagawa and even Shizuoka. The death count was over 130,000.

Page 67

## [Russia's Curse]

The entire Russian Orthodox Church continuously cursed Japan during the Russo-Japanese War. Regardless, Russia still lost. However, 18 years later, Japan was hit by the Great Kanto Earthquake of 1923. Although his curses seem to hit the mark eventually, it is said that Russia's god is located 18 light years away. As an added note, Russian newspapers still print advertisements for curse relocation services, where you can pass your curse onto someone else.

## Dear Hetalia Fans,

Hetalia Axis Powers is finally here! First off, we cannot thank the fans enough. You are truly what made this project possible. It was the thousands of cosplay pictures all over the internet, the innumerable forums and the passionate participation in the fan community that really made us amazed at what Hetalia has done to the world. I hope you know your fandom totally blew away our Japanese partners as well. You should be proud of yourselves!

As much as I enjoyed working on Hetalia, I have to say this manga was quite an undertaking. From the start, we knew it was an extremely high-profile title and insanely loved by the fans so it was our mission to give you a truly authentic product. Therefore, we worked closely with our Japanese partners who have the direct connection with the creator. We were constantly on the phone late at night for things like naming convention of the characters and going back and forth on approvals. I was even able to snag an interview with the Japanese editor of Hetalia when we went to Japan. She has worked with Himaruya-sensei for about three years and was extremely sharp and knowledgeable. We talked about *gijin-ka* (Japanese word for anthropomorphism, the act of giving human characteristics to inanimate objects or in the case of Hetalia, countries), and she told me that Japanese people never thought of countries as people so they really appreciated the original concept. When I asked her to tell me something about Himaruya-sensei, without hesitation, she stated he's a genius and whatever he says, while not always funny, is definitely interesting and constantly gives you food for thought. Lastly, she stated that Himaruya-sensei would like his fans to consider themselves as family and continue to support the series as such. It was extremely heartwarming to hear that.

Speaking of partners, FUNimation was also a star! We have always had a strong relationship, and I believe Hetalia helped to cement it. We constantly helped each other really promote the brand itself and tried hard to get on the same page to the best of our ability. A very special thanks to Cheree and Charlene ☺

With that said, fans of Hetalia, thank you so much for your patience and participation. The cosplay pictures you posted on our Facebook wall were so much fun. Thank you for being so passionate about this series. We definitely look forward to the second volume.
